PROJECT

Title: Job application form page

Domain: Web development

Description: This project involves creating a web page for job applications using HTML. At the top of the page, a formatted job description will be generated to provide applicants with essential information about the position. Below the description, a simple HTML form will be designed to collect at least ten key pieces of information from job applicants, such as their name, contact details, work experience, education, and skills.

Tools used: HTML, CSS

SOFT SKILLS AND INTERESTS:

- Cricket
- Time Management: Prioritizing tasks and managing time efficiently.
- Traveling: Experiencing new cultures and environments.
